

I can see everything I need from both PDFs. You want a full technical specification document for building a PDF flipbook website with:

1. Apple Books-style page curl animation (cursor-tracked, perpendicular bisector math)
2. Reading progress overlay (top-right: circular completion ring)
3. Reading stats overlay (bottom-left: pace in min/page + time remaining)

Let me read the SKILL.md first, then write the full spec doc.

Now I have everything. Let me write the full technical spec document.
